Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. In view of the remarks set forth in Applicant's Amendment, filed May 24, 2004 the finality of the last Office action has been withdrawn.

2. Claims 1-7, 9, 12-13, 20, 22-24, and 31-34 have been canceled.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8, 10-11, 14-19, 21, 25-30, and 35-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Homma et al in view of Kido et al(US 6299659). Homma et al disclose a method for polishing organosilicate layer on a substrate comprising substantially all of the subject matter set forth in applicant's claims above. Note the use of an aqueous solution of abrasive within the pH range recited. The values of pressure and platen rotational speed disclosed in Homma et al are within the recited ranges of polishing pressure and platen rotational speed. While Homma et al disclose ceria as the abrasive of choice, it is known from Kido et al to use silicon dioxide in lieu of ceria(cerium oxide) as the abrasive, in polishing wafers. To substitute a conventional inexpensive metal oxide abrasive such as silicon dioxide, aluminum oxide, zirconium oxide, or titanium oxide for the ceria abrasive in the method of Homma et al would have been obvious in view of Kido et al.

5. Applicant's arguments with respect to claims 8, 10, 11, 14-19, 21, 25-30, and 35-36 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3723

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

7. A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

8. Any inquiry concerning this communication should be directed to Robert Rose at telephone number (703) 308-1360.
